

Smart Objects

Session cookie PHPSESSID

The following Smart Objects create a session cookie (PHPSESSID) which are used to authenticate users and improve performance, and which expire at the end of the visitor's browser session:

- Active Viewers
- Blog
- CMS
- Forum*
- **Hit Counter**
- NewsPoll
- Resource Booker
- Shout Box
- User List

* An additional session cookie (phpBB) is created by this Smart Object for user authentication and session management.

What happens to Smart Objects if web visitors disable cookies

If cookies are disabled in the web visitor's browser, Smart Objects will stop functioning or will produce unexpected results. As a result, it may be necessary to bear this in mind when preparing any cookie policy for your website.
